

In-service Inspection of Aboveground Atmospheric Fiberglass Reinforced Plastic Tanks and Vessels 2007[©]

FT&V 2007-1 Recommended Practice 1st Edition.

FTV RP 2007, March 2018 release.

Preface

Recommended Practice FT&V 2007-1 (formerly FTPI) "In-service Inspections of Aboveground Atmospheric Fiberglass Reinforced Plastic Tanks and Vessels" was developed in response to requests in 2002 to the Fiberglass Tank & Pipe Institute by aboveground fiberglass tank users, engineering companies and governmental bodies.

The Institute had out-sourced the project to Curran Consulting Ltd and Sullivan Curran P.E., Executive Director, who formed a peer review group that contributed their expertise on the fabrication, operation and maintenance of aboveground fiberglass tanks & vessels and their corrosion resistant applications.

In 2017, ownership was transferred from the Fiberglass Tank & Pipe Institute to Curran Consulting Ltd and Sullivan Curran P.E.

Also in 2017, stewardship of this recommended practice was transferred to H.I.R. Technical Services.

The seller of this document is not responsible for its content, legal applicability or legal standing in relationship to any given tank or vessel.

H.I.R. Technical Services, *Management.*

Table of Contents

1)	Preface	2
2)	Annex list	5
3)	Special notes	7
4)	Section 1 Introduction	9
5)	Section 2 Safe Working Practices	10
6)	Section 3 Definitions	10
7)	Section 4 Codes and Standards	12
8)	Section 5 Inspector Qualifications	12
9)	Section 6 Periodic Preventive Maintenance (PM) Tank and Vessel Inspection	13
10)	Section 7 External Inspections are to be performed by a Trained Inspector.	17
11)	Section 8 Internal Inspections are to be performed by a Trained Inspector	20
12)	Section 9 Internal Inspection	21
13)	Section 10 Pressure Test	21
14)	Section 11 Acoustic Emission Test	22
15)	Section 12 Interstitial Vacuum Test	23
16)	Section 13 Reports and Record Keeping	23
17)	Section 14 References	24

Annexes A - V

Atmospheric Fiberglass Tank or Vessel Information Record	Annex A	25
Monthly and Annual Tank or Vessel Check List and Inspection Record	Annex B	26
Internal Tank/Vessel Check List and Inspection Record as performed by a trained inspector.	Annex C	29
Aboveground Fiberglass Reinforced Plastic Tank and Vessel Fabrication Information	Annex D	33
Firm Foundations	Annex E	38
Visual learning Aids	Annex F	41
Visual acuity form	Annex V	42

Special Notes

This recommended practice attempts to address problems that are expected or could reasonably be expected to occur to or with a fiberglass tank or vessel as described herein. Any issue or situation arising that is distinctly beyond the scope of this recommended practice should be addressed by a more appropriate document.

Since this is only a recommended practice, always check for more stringent local, state, and federal laws regulations as relating to a fiberglass tank or vessel as described herein.

This is not an all-encompassing recommended practice and reference to other a fiberglass tank and vessel documents may need to be considered.

The contents of this recommended practice shall not be interpreted to be transferring any rights, by inference or reference, as relating to any product, services, and or trademark(s) that may be protected by international patent law(s). This recommended practice is copyright protected and may not be copied or reproduced in part or in its entirety.

Shall: As used herein, “shall” denotes best practice.

Should: As used herein, “should” denotes a recommendation that is advised but not required in order to conform to this recommended practice.

Each edition, revision, or addenda to this recommended practice may be used beginning with the date of issuance until the release of the next edition.

Requests for permission to reproduce or translate all or any part of the material published herein should also be addressed to the director.

Status of this recommended practice may be ascertained by calling H.I.R. Technical Services at telephone number (814) 706-7514.
